DETAILED ACTION

- 1) Acknowledgement is made of Amendment received 10/10/2006.

Claim 7 is amended.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1731

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2) Claims 1-14, are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Dezutter (6,811,879).

Claims 1-2, 7-9, 12-13: Dezutter discloses process wherein pulp is blended with adjuvants, flaked and finally dried, as shown in Figure 1. The pulp is a dewatered pulp as disclosed by Vrbanac in US 6,769,199, (the disclosure of which is incorporated by reference in its entirety). The pulp enters a screw where mixing occurs and then proceeds to a flaker. Then the flakes are dried in a drum drier. Even distribution of pulp onto a belt conveyor is disclosed by Vrbanac in Figure 2. Dezutter discloses the invention, or in the least, it would have been obvious to one skilled in the art at the time the invention was made that such differences are obvious over the cited art. Also, in view that the present claims are open by reciting "comprising", the cited art process may include additional steps in the process between the claimed steps.

Claims 3, 9: jet drier drying is disclosed by Vrbanac (Abstract).

Claims 4, 10: the adjuvants are disclosed (Dezutter, col. 4. lines 45-68).

Claim 5: dewatering occurs in a screw press (Dezutter, col. 5, lines 1-2).

Claims 6, 11: the flakes size is disclosed (Dezutter, col. 5, lines 18-20).

Claim 14: leveling by chute and rotary distributor are disclosed by Vrbanac in Figure 2.

Response to Amendment

- 3) Claims 7-14, rejection under 35 U.S.C. 112, second paragraph, is withdrawn in view of amended claim 7.
- 4) Claims 1-14, rejection under 35 U.S.C. 102(e) as being anticipated by Dezutter is withdrawn.
- 5) Applicant's arguments with respect to pending claims have been considered but are moot in view of the new ground(s) of rejection.
